Equations | The Cavalcade o' Chemistry

When you find difficulty in balancing the equation in the balancing chemical equations worksheet, you can miss it with a fraction of ½ and that will easily balance the equation. But the problem is that you cannot have a fraction for the co-efficient, this is why doubling all coefficients will help you balance the equation.

49 Balancing Chemical Equations Worksheets [with Answers]

The way that we balance equations is to write coefficients in front of the chemical formulas in an equation. These coefficients multiply the number of atoms of each element in these formulas, so if you see a "2" in front of water, you'll know you have four hydrogen atoms and two oxygen atoms.
