Cinematography sets and supports the overall look and mood of a film's visual narrative. Each visual element that appears on screen, a.k.a. the mise-en-scène of a film, can serve and enhance the story—so it is the cinematographer's responsibility to ensure that every element is cohesive and support the story. Filmmakers often choose to spend the majority of their budget on high-quality cinematography to guarantee that the film will look incredible on the big screen.

See Article History. Cinématographe, first motion-picture apparatus, used as both camera and projector. The invention of Louis and Auguste Lumière, manufacturers of photographic materials of Lyon, Fr., it was based in part on the Kinetoscope of Thomas A. Edison in the United States and in part on the Théâtre Optique of Émile Reynaud in Paris. From Edison's invention the Lumières took the idea of a sprocket-wound film and from Reynaud that of projecting the successive frames on a screen.
