Clean code contains a minimal number of classes and other moving parts. Less code is less stuff to keep in your head. Less code is less maintenance. Less code is fewer bugs. Code is liability, keep it short and simple. Clean code passes all tests. You know your code is dirty when only 95% of your tests passed.

Clean code - Refactoring and Design Patterns

The Clean Code rules apply equally to the production code and the test code. So do code cleanup every time when you write tests. As a result, you will begin to notice opportunities for refactoring right after adding a new test.

debt. The mantra of refactoring is clean code and simple design.

Refactoring: clean your code

This workshop is a continuation of Refactoring to Clean Code training and is based on an assumption that attendees can perform some initial clean-up of codebase. Such a clean-up allows us to notice emerging design patterns out of the mess of legacy code.
