Syncope in seniors can be attributed to age-related neurohumoral and physiological changes in conjunction with medications (TABLE 1) and comorbid chronic diseases, ultimately decreasing the delivery of cerebral oxygen via multiple mechanisms. 6 While 60% of persons experience their first faint (syncope) at younger than 25 years of age, 10% to ...

Syncope: Medications as Cause and Contributing Factors

Syncope is a temporary loss of consciousness, commonly referred to as fainting, or passing out. It is a fairly common event—a majority of people pass out at least once in their lives. Still, syncope is always a potentially serious issue, both because it may indicate a serious underlying problem, and because any loss of consciousness can produce injury.

Medical Causes of Syncope or Fainting

Syncope is a sudden, temporary loss of consciousness, followed by a fall from a standing or sitting position. A syncope episode is usually short. What causes syncope? Syncope is caused by a decrease in blood flow to the brain. When blood flow to the brain decreases, oxygen to the brain

The History. To evaluate syncope, sound clinical decisions are based on a carefully performed history with extreme attention to detail. The history, with its proper interpretation (Table 1) and a directed physical examination, is the only appropriate way to guide further diagnostic evaluation. The history and physical alone can be diagnostic in 25%-35% of patients [1,4,16].

Evaluation of Syncope: An Overview

She subsequently undertook a diploma in Syncope and related Disorders at RCPI, Dublin. She has authored a number of publications related to syncope and PoTS, and her work has shown that GPs often fail to enquire about syncope red flags.

Syncope Spotlight Project

Syncope is a sudden, brief loss of consciousness (LOC) with loss of postural tone followed by spontaneous revival. The patient is motionless and limp and usually has cool extremities, a weak pulse, and shallow breathing. Sometimes brief involuntary muscle jerks occur, resembling a seizure.
