will be dip-netting for aquatic invertebrates in a pond. Remind students to wear old clothes and shoes in case they get wet or dirty. Long pants and close-toed shoes are highly recommended. Shorts and flip flops are not appropriate. Encourage students to apply sunscreen and insect repellent if they choose BEFORE traveling to the refuge.

Pond Insect Survey - U.S. Fish and Wildlife Service
Fish and invertebrates. Fish and invertebrates are not normally considered to be nuisance organisms in ponds except for a select few species. Considering that fish and invertebrates are some of the most species rich of all of the groups of animals, there is no way that this page can cover the biology and control of all of these animals. It must be noted, however, that most fish and invertebrates are either beneficial or benign to stormwater ponds or are not adapted to survive well in these ...
