**Structure and Basic  
Functions—Part I**

The hindbrain is the most primitive part of the brain. It regulates all of our most vital processes with three structures: the medulla, pons, and cerebellum. The medulla controls automatic (involuntary) functions of the body, such as breathing, heart rate, and blood pressure. The pons is part of the brainstem.

The central nervous system contains the brain and spinal cord, while the peripheral nervous system contains spinal nerves comprised of motor and sensory neurons. Sensory neurons convey information about the external environment to the brain, which in turn converts them into internal electrical impulses.
