Force and Newton's Laws Study Guide 1. State the law of universal gravitation. The force of gravity acts between all objects in the universe. 2. What is weight? Weight is the measure of the force of gravity on an object. 3. Why do scientists prefer to describe matter by its mass instead of weight? Weight can change with location but mass will stay constant.

## **Chapter 13 Universal Gravitation Answers 4**

Study Guide Universal Gravitation Answers Newton's Law of Gravitation is a universal law and it's a fundamental law which gives an idea about the forces of interaction between two point masses. If there are two masses given to us  $m_1$  and at some separation, another mass  $m_2$  is kept and the distance is  $d$ , then according to the ...
