Toward a Smarter Military. "Socio-Cultural Intelligence and National Security", Author: Robert R. Tomes, Parameters Summer 2015, Vol. 45, No.2. I can certainly recognize the socio-cultural intellectual capacity of this author and understand the requirements for human domain analysis. I am also impressed with the huge amount of data being collected.

The Military Revolution is the theory that a series of radical changes in military strategy and tactics during the 16th and 17th centuries resulted in major lasting changes in governments and society. The theory was introduced by Michael Roberts in the 1950s as he focused on Sweden 1560-1660 searching for major changes in the European way of war caused by introduction of portable firearms.

Military Revolution - Wikipedia

The document goes on to state that this "intellectual overmatch . . . cannot be achieved without substantially enhancing the cognitive capacities" of our military. At present, pundits , professors , and potential adversaries recognize that we are in a race to achieve cognitive superiority.

The Missing Domain of War: Achieving Cognitive Overmatch ...

In "Intellectual Property Rights & National Security," Rob Farley and Jacqueline E. Whitt discuss the legal and normative frameworks to manage and protect a nation's intellectual property (IP). In today's competitive environment, IP that a military leverages is critical for sustaining competitive advantage, but there are significant challenges from competing commercial interests to adversaries ...

The Making of the Cold War Enemy: Culture and Politics in ...

Vision and Guidance recognizes that complexity across the five battlefield domains will require officers to have a heightened level of intellectual prowess. America's inability to rely on mass or superior technology will make warfighting more complicated than it has been at any point in recent memory.

On the Path to Intellectual Overmatch - War on the Rocks

The battle over IP rights — and how much work the Pentagon can bring in-house in an effort to save money — has intensified in the Army as it faces the worst fiscal crunch of all the military services.

Defense Industry Intellectual Property The Battle Continues

Military technology, range of weapons, equipment, structures, and vehicles used specifically for the purpose of fighting. It includes the knowledge required to construct such technology, to employ it in combat, and to repair and replenish it. Success in combat hinges on the tactically effective use of this technology.
