Version 2.0 - This version uses rectangular maps rather than mollenweide maps like in version 1.0. Another note of interest is that some time periods are shown...

Earth's Paleogeography - Continental Movements Through Time

Today, we know that the continents rest on massive slabs of rock called tectonic plates. The plates are always moving and interacting in a process called plate tectonics. The continents are still moving today. Some of the most dynamic sites of tectonic activity are seafloor spreading zones and giant rift valleys.
